

# ADWEKO Integrate for FSDM & BSM

With the **ADWEKO Integrate for FSDM & BSM**, we integrate the internationally successful solution for total bank management from FIS with the innovative data platform for financial institutions SAP FSDP.

In order to cover all functional areas and requirements for total bank management with S/4HANA and SAP FSDP, ADWEKO offers Integrate for FSDM & BSM.

## Standardized integration

- Ready-to-use mapping of FSDM, and BSM data models
- Fully tested interface
- Single point of contact for data delivery/integration (FSDM serves Risk)
- Expertise through partnerships (SAP/FIS/ADWEKO)

## Reduced implementation costs

- Your integration efforts in all project phases (from conception, implementation, testing, to GoLive) are significantly reduced. The pre-configuration, documentation & test data are delivery components of the adapter.

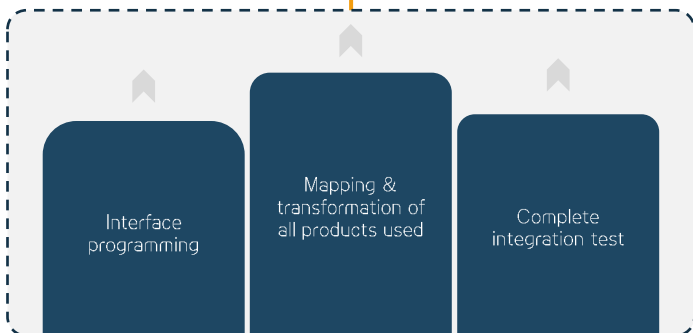

## Maintenance & development package

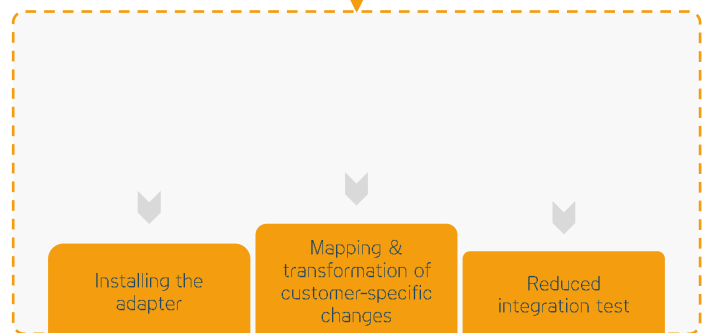

- Support for SLAs
- Coordinated release process in direct dependency of the surrounding systems (FSDM, Balance Sheet Manager)
- Established quality through standardization and planned use by multiple customers

## Your cost advantage

Cost / time reduction

Integration efforts without adapter
